

Drug Dosage Extraction of Pharmacist Notes in MIMIC Using LLMs for Discrepancy Flagging

Owen Wurst
owurst@utexas.edu
University of Texas
Austin, Texas, USA

ABSTRACT

Your abstract goes here. It should briefly summarize the main points and contributions of your paper.

KEYWORDS

MIMIC3, Medical NLP, Large Language Models, Llama, Data Annotation, Machine Learning/Deep Learning

ACM Reference Format:

Owen Wurst. 2025. Drug Dosage Extraction of Pharmacist Notes in MIMIC Using LLMs for Discrepancy Flagging. In . ACM, New York, NY, USA, 1 page. <https://doi.org/10.1145/nnnnnnn.nnnnnnn>

1 INTRODUCTION

Introduce your topic, explain the motivation, and outline your contributions.

2 RELATED WORK

Summarize and cite prior research relevant to your topic.

3 METHODOLOGY

Describe your approach, algorithms, models, or system design in detail.

4 RESULTS

Present experiments, datasets, evaluation metrics, and findings.

5 DISCUSSION

Interpret results, discuss limitations, and compare with prior work.

6 CONCLUSION AND FUTURE WORK

Wrap up the paper and mention possible extensions.

ACKNOWLEDGMENTS

Thank you to Dr. Ying Ding and all the TAs, especially Monte Jarvis. Thank you also to gpt4all, <https://www.nomic.ai/gpt4all> for having free access to high performing lightweight LLMs that can be hosted locally.

Permission to make digital or hard copies of all or part of this work for personal or classroom use is granted without fee provided that copies are not made or distributed for profit or commercial advantage and that copies bear this notice and the full citation on the first page. Copyrights for components of this work owned by others than the author(s) must be honored. Abstracting with credit is permitted. To copy otherwise, or republish, to post on servers or to redistribute to lists, requires prior specific permission and/or a fee. Request permissions from permissions@acm.org.
